Subject: Letter of Recommendation for Mr. Armaan Chowdhry

Being a Director and Chief Technology Officer of Quantum Phinance Consulting Pvt. Ltd, a role which I have held for almost 10 years, I am in a good position to recommend Armaan to your University for a masters course in Data Science.

I have known Armaan since he joined our company two years ago. We employed him at a time when the success of our product depended on perseverance and a high calibre of diligent work by our implementation team. Interestingly, immediately after he joined, he delivered on a challenging project of Chatbot-Chat Interpretation and Analysis; which was significant for us in establishing the credibility of our product in an unexamined sector. It required him to understand the intricacies of several complex chat structures, figure out how to frame the analysis in a tractable manner, and develop and implement algorithms to generate reports with the help of an unfamiliar product. The accuracy of the reports and the capability to handle large data sets were integral to the success of the project. His resolve and performance gave us the confidence to assign him to challenging clients and projects. In a span of two years, he has become one of the most trusted members of our expanding team and currently leads an implementation team at one of our clients.

Grasping partially specified problem statements, following up with the right questions, and finding practical solutions with the available tools are some of the traits he excels in. Having a natural inclination towards mathematics, analytics, logical reasoning, his eagerness to learn tools necessary for the work says a lot about his character. He has great communication skills and a friendly personality with a joyous and optimistic take on life. Also, he has manifested strong leadership qualities during his short time in the company.

Based on my experience and interactions with him, I feel confident that he has made a good choice. His qualities and abilities are well-suited to the field of data science. The academic course will help him to combine his natural abilities with mathematical, statistical and algorithmic tools and techniques. His prior experience and diligence towards work will ensure that he adds value to your program.

I strongly recommend him for this course and will gladly provide any further information that may be necessary.

Yours Sincerely,

Koustubh Moharir,
Chief Technology Officer,
Quantum Phinance Consulting Pvt. Ltd.
